

## **ENVIRONMENTAL POLICY**

Absolicon Solar Collector AB is an innovative growth company with headquarters in Härnösand and several workplaces in Sweden and other countries.

**Mission:** By providing world-leading, cost-effective solar heat solutions for industries around the world, we are on a mission to lead the change towards a sustainable heat supply for our planet.

**Vision:** Our unique technology outperforms fossil fuels and transform the world's heat supply to renewable energy by being present in all countries of the earth.

In product development and production, climate impact and other significant environmental aspects are taken into account throughout the life cycle, i.e. suppliers, own impact, customer benefit.

In Absolicon's own work to prevent environmental impact and contribute to environmental improvements, priority is given to goals and follow-up for material selection and other purchases, chemicals, waste, travel and transport, land use, energy and climate.

To spread our technology and knowledge about solar energy, we collaborate with schools, universities, authorities and other companies both in Sweden and global.

Absolicon works with continuous improvements based on national and international agreements as well as requirements and expectations from shareholders, employees, customers, partners, authorities and other stakeholders.
