

QUALITY POLICY

Absolicon Solar Collector AB is an innovative growth company with headquarters in Härnösand and several workplaces in Sweden and other countries.

Mission: By providing world-leading, cost-effective solar heat solutions for industries around the world, we are on a mission to lead the change towards a sustainable heat supply for our planet.

Vision: Our unique technology outperforms fossil fuels and transform the world's heat supply to renewable energy by being present in all countries of the earth.

The quality work will support Absolicon's business goals of development, partnership and sustainability for rapid global expansion.

In order to offer our customers world-class products and production lines that can change the world's energy supply, the business's internal and external processes must be constantly developed and improved.

Commitment, respect, vision and competence of each employee is the basis for continuous improvements of the environmental and quality work within Absolicon.

To spread our technology and knowledge about solar energy, we collaborate with schools, universities, authorities and other companies both in Sweden and internationally.

In our improvement work, we collaborate with controlled suppliers and partners regarding quality and significant environmental aspects such as material selection, chemicals, waste, travel and transport, land use, energy and climate.

We comply with applicable laws and regulations and are sensitive to changes in the world around us and expectations from shareholders, employees, customers, partners, authorities and other stakeholders.
